

1. When was the Kaluga branch founded?
2. How many students study here?
3. How many teachers train here?
4. How many faculties are here?
5. How many departments are here?
6. How long must one study here?
7. How many points did you need to enter the university?
8. What scholarship can student get here?
9. What should I do to get the scholarship?
10. When is the scholarship paid?
11. How many learning campuses do the Kaluga branch include?
12. Whom can I become after graduate?
13. How many graduates work in their specialty?
14. What subjects do students study?
15. When do students take the exams?
16. When do holidays begin?
17. How to pass an exam automatically?
18. How many students that came from other cities are here?
19. How can I check my academic performance?
20. When will new learning campuses be built?

I am a first-year student of the Information Technologies department of the Informatics and Control faculty of the Kaluga branch of Moscow State Technical University named after Bauman. Now I study general engineering subjects as well as humanitarian subjects (e.g. cultural studies, after we take that course we will study history). In two years I will study specialized subjects. Because of the epidemic we may continue our studies in remote form. It depends on our university decision. If it happens we will study at home by means of the Internet and our computers. I hope that we will continue full-time education because I think that this way the quality of education will be better.
